

Konftel 300 Analogue Conference Unit

It features connectivity options for loudspeaker equipment, headsets and additional microphones - making it ideal for talks and lectures in larger meeting rooms. The Konftel 300 can be connected to analogue telephone lines, mobile phones, wireless DECT telephones and computers for VoIP calls. The most exciting developments are the built-in recording capability, a unique conference guide with number recall memory, as well as a host of other new features, all easily accessible through the large display screen.
